REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record teach a computer controller apparatus for simulated testing of various communication network components in which a translator device is employed for automatically generating test tools used in the testing of a communication network component. Also taught is message templates are sorted to provide automatic generation of computer software based models to simulate operations of network entities. Mack et al., (U.S. Patent number 6,158,031) is one such example of prior art. The prior art of record, however, fails to teach, singly or in combination automatically verifying processing of the test case request against the computer structure by comparing the actual results against the simulation results. The subject matter sought to be patented as recited in the claims in this application has practical applications in the field of software testing in the distributed computing environment.

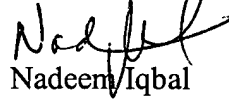

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nadeem Iqbal whose telephone number is (571)-272-3659. The examiner can normally be reached on M-F (8:00-5:30) First Friday Off.
